EverClub is the #1 networking platform in the world, 100% decentralized and **fully powered by BNB Smart Chain blockchain smart contracts.**

EverClub has over a hundred thousand members from over 100 countries, who have already changed their lives by joining EverClub and becoming financially independent.

Every EverClub user automatically became the owner of his own online business of earning cryptocurrency online!

DECENTRALIZATION

A platform built with blockchain technology that runs on smart contracts and allows you to open 100% profit generating opportunities. Absence of administrators and centralized forms of management allows the community to be as free and independent as possible.

SECURITY

EverClub smart contracts work fully autonomously (minimizing human factor), instantly allocate funds to users' wallets, and provide security against outside interference, while ensuring that no funds are kept on EverClub balance, no one from the team or other users have access to withdrawals, and the smart contract balance is always zero.

EFFICIENCY

In EverClub, there is no limit to the maximum profitability. The efficiency provided by the platform is beyond competitors, and cross-platform and functional interfaces make your business more convenient.

TRANSPARENCY

The source code of EverClub smart contracts is publicly available and fully open to third-party auditing.

All transactions are open and transparent through the use of blockchain technology and are available for anyone to examine. This allows you to monitor all the actions and statistics of the platform, as well as view any account in real time, and be confident in the reliability of the information provided by the platform.

EQUALITY

It is never too late to join EverClub!

Statistics of the platform show that even a newly registered member can earn thousands of dollars in a few weeks or even a few days!

BENEFITS OF DECENTRALIZATION

When you hear or read that EverClub is a 100% decentralized platform, do you know what the benefits and advantages of using this technology are?

Decentralized marketing is created through an automated contract that guarantees you maximum security and stability.

A smart contract is an algorithm with automated execution that exists inside the BNB Smart Chain blockchain, which is one of the leading and popular blockchain today. Smart contracts, like cryptocurrencies themselves, are decentralized. They operate strictly according to a certain algorithm, and once they are launched, it is impossible to change their mode of operation. The source code defining the logic of a smart contract is in a blockchain, and all calculations are performed by tens or hundreds of thousands of computers around the world. This huge number of nodes in the network ensures that the smart contract is secure and cannot be hacked or stopped.

BENEFITS OF USING BUSD

BUSD is a Stablecoin, with a fixed rate of \$1.

This cryptocurrency is fully vetted and verified by numerous audits of the source code and is approved by the New York State Department of Financial Services.

5 BENEFITS OF BUSD FOR EVERCLUB:

- 1. Fixed Cost.** Your EverClub returns are no longer affected by the value fluctuations common to classic cryptocurrencies or crypto market corrections.
- 2. BUSD** cryptocurrency can be exchanged for any other cryptocurrency at numerous DEX exchangers with negligible commissions and literally in a couple of clicks.
- 3. Simplicity and convenience of calculations:** registration fees, platform purchases are now specified in dollar equivalent.
- 4. Accuracy in yield planning.** With BUSD you can accurately track your expenses and estimate your yield without having to convert from one unit to another.
- 5. Protection of participants' interests.** BUSD is fully backed by the U.S. dollar at a ratio of 1:1 and can always be exchanged for U.S. dollars. This cryptocurrency was created through a partnership between Paxos and Binance.

EverClub marketing is implemented on smart contracts functioning on the BNB Smart Chain blockchain. Within the platform, it uses the BUSD token, a BEP-20 token with a stable exchange rate of \$1. To send BUSD or any other token functioning in the BNB Smart Chain blockchain, you will need a certain amount of BNB to pay the fee.

BNB - is the native coin of the BNB Smart Chain blockchain and is required to pay intra-network transaction fees.

BUSD - is a BEP-20 standard token on the BNB Smart Chain blockchain with a stable rate of 1 USD.

EverClub uses a matrix system based on decentralized smart contracts technology. Profits are achieved by inviting new partners to your team, who, once registered, stay with you forever, as this data is recorded in the blockchain. Income is distributed automatically and instantly to participants' personal wallets.

Members get access to marketing programs that vary in terms of interaction between partners. The most effective method is to use all of these programs in parallel.

Level 1

Activating any EverClub level once, it is assigned to you forever and does not require any additional rewards.

Higher levels = more income.

Marketing income is generated from the value of the tier in which your affiliate has taken a seat. Therefore, working at higher levels increases your results. Marketing is structured in such a way that revenue from one cycle is enough to activate the next level. Automatic cycles at all levels.

The levels of each program contain a fixed number of spots. Once all spots on a level are filled, a new cycle automatically begins. The number of cycles is not limited. A tier activated once allows you to invite an unlimited number of new partners.

Referral link. All personal partners you invite are assigned to you forever, and this cannot be changed, as it is written in the smart contract.

EVERCLUB SMART CONTRACTS.

The EverClub platform is based on smart contract technology. EverClub smart contracts are programmed in such a way that they never store participants' funds; their balance is always zero.

The purpose of a smart contract is to automatically redirect funds from incoming transactions to other members' wallets, in accordance with the rules of the marketing program.

REFERRAL LINKING

In addition, your referral attachment remains unchanged, you can't change your superior partner, as well as your inferior partners are assigned to you in your structure forever.

PERSONAL WALLET

To become a member of the program, you need to create your personal wallet.
