

MANIFESTO

EVERCLUB

Surely we are all concerned about the global problems facing the international community: the climate, food, environmental and demographic crises. Today, a new problem has been added to this list in the form of poverty and its consequences in the form of hunger, a catastrophic drop in living standards, security problems, lack of access to medicine and medicines.

It is hard to believe, but poverty is growing at an alarming rate. And if in developed countries, the criterion of "poverty" is reduced to people with an income **of less than 40% of the average income in the country** (which is usually calculated in thousands of dollars), then in developing and poor countries, it covers those earning **less than \$2 a day**. In addition, there is a special international criterion of "super-poverty" which actually determines the marginal level of poverty in terms of human survival. This group includes people whose income is less than \$1 per day.

Definitely, the above figures are scary, but this is just the tip of the iceberg called the international problem of poverty. In fact, the true scale is much more global.

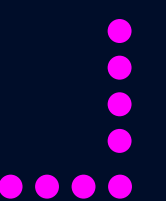

The entire progressive international community is seriously concerned with looking for ways to solve this problem. For this reason, a steady trend has formed for interest in companies, organizations and projects working in this direction. Given the scale of the problem and its strategic importance, this trend will continue for the coming decades.

If you are not indifferent to this problem and want to contribute to its solution, then welcome the EverClub project!

At EverClub, we believe that there is only one way to defeat poverty – education.

There is a famous parable: “Give a man a fish and you feed him for a day; teach a man to fish and you feed him for a lifetime.” It is a perfect reflection of the EverClub philosophy and our idea for solving the problem of poverty.

EverClub is not just another educational startup or online academy. We want to popularize the process of obtaining new professional skills and high-quality knowledge, mastering new professions and improving the effectiveness of existing skills.

HOW DO WE PLAN TO DO THIS?

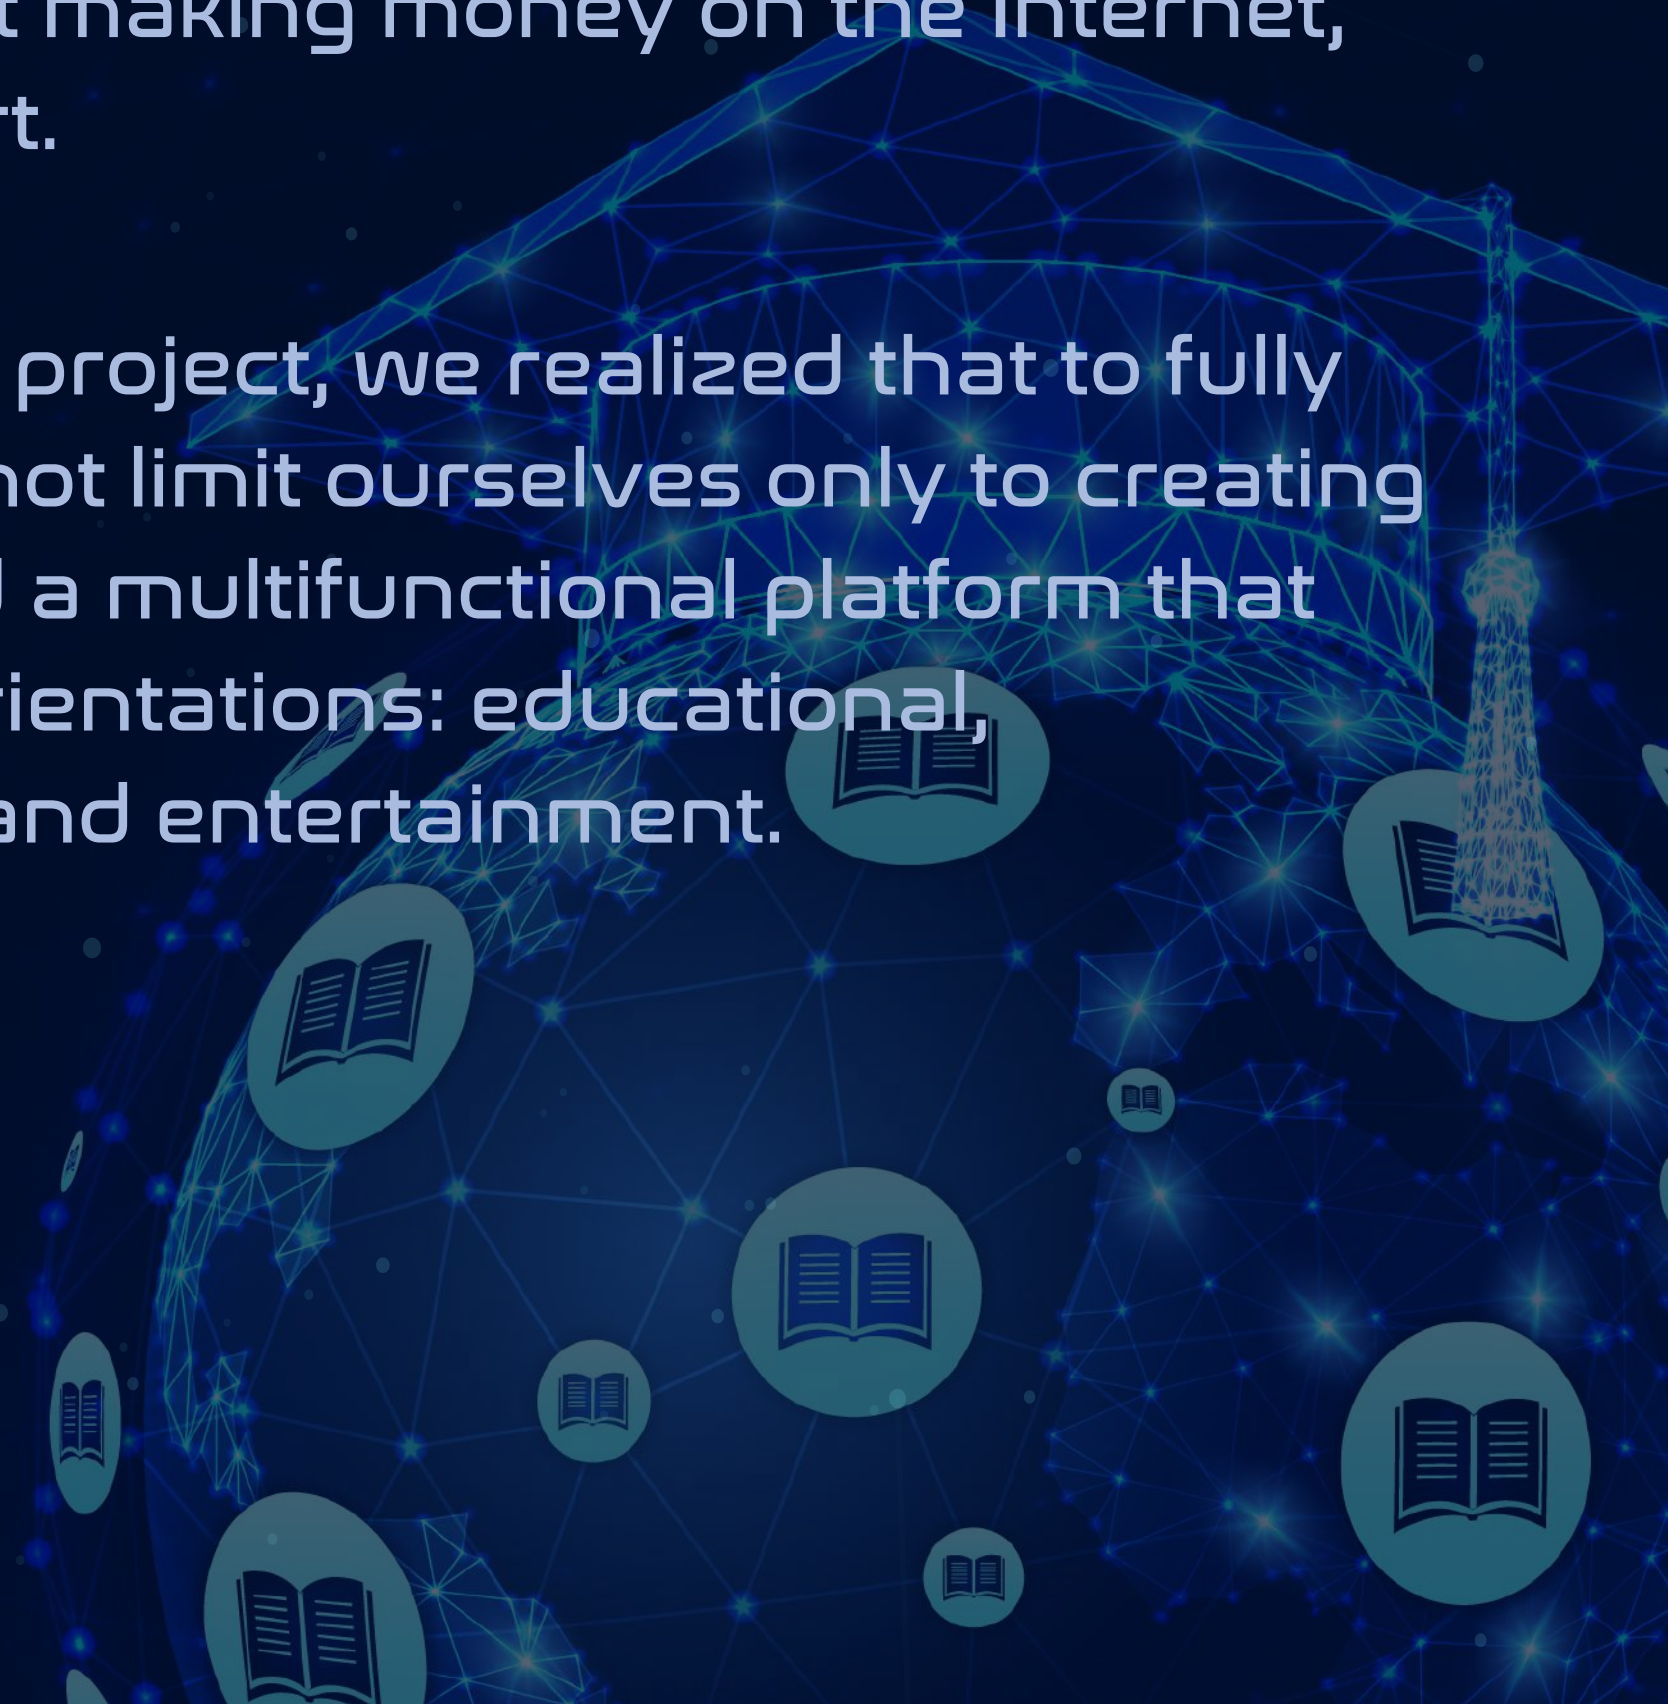

Very simple: all educational programs presented on the EverClub platform will be completely free!

But even the possibility of free education is not our main "feature" - EverClub itself will pay its users for successful learning!

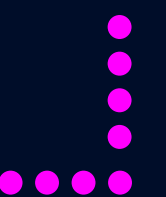

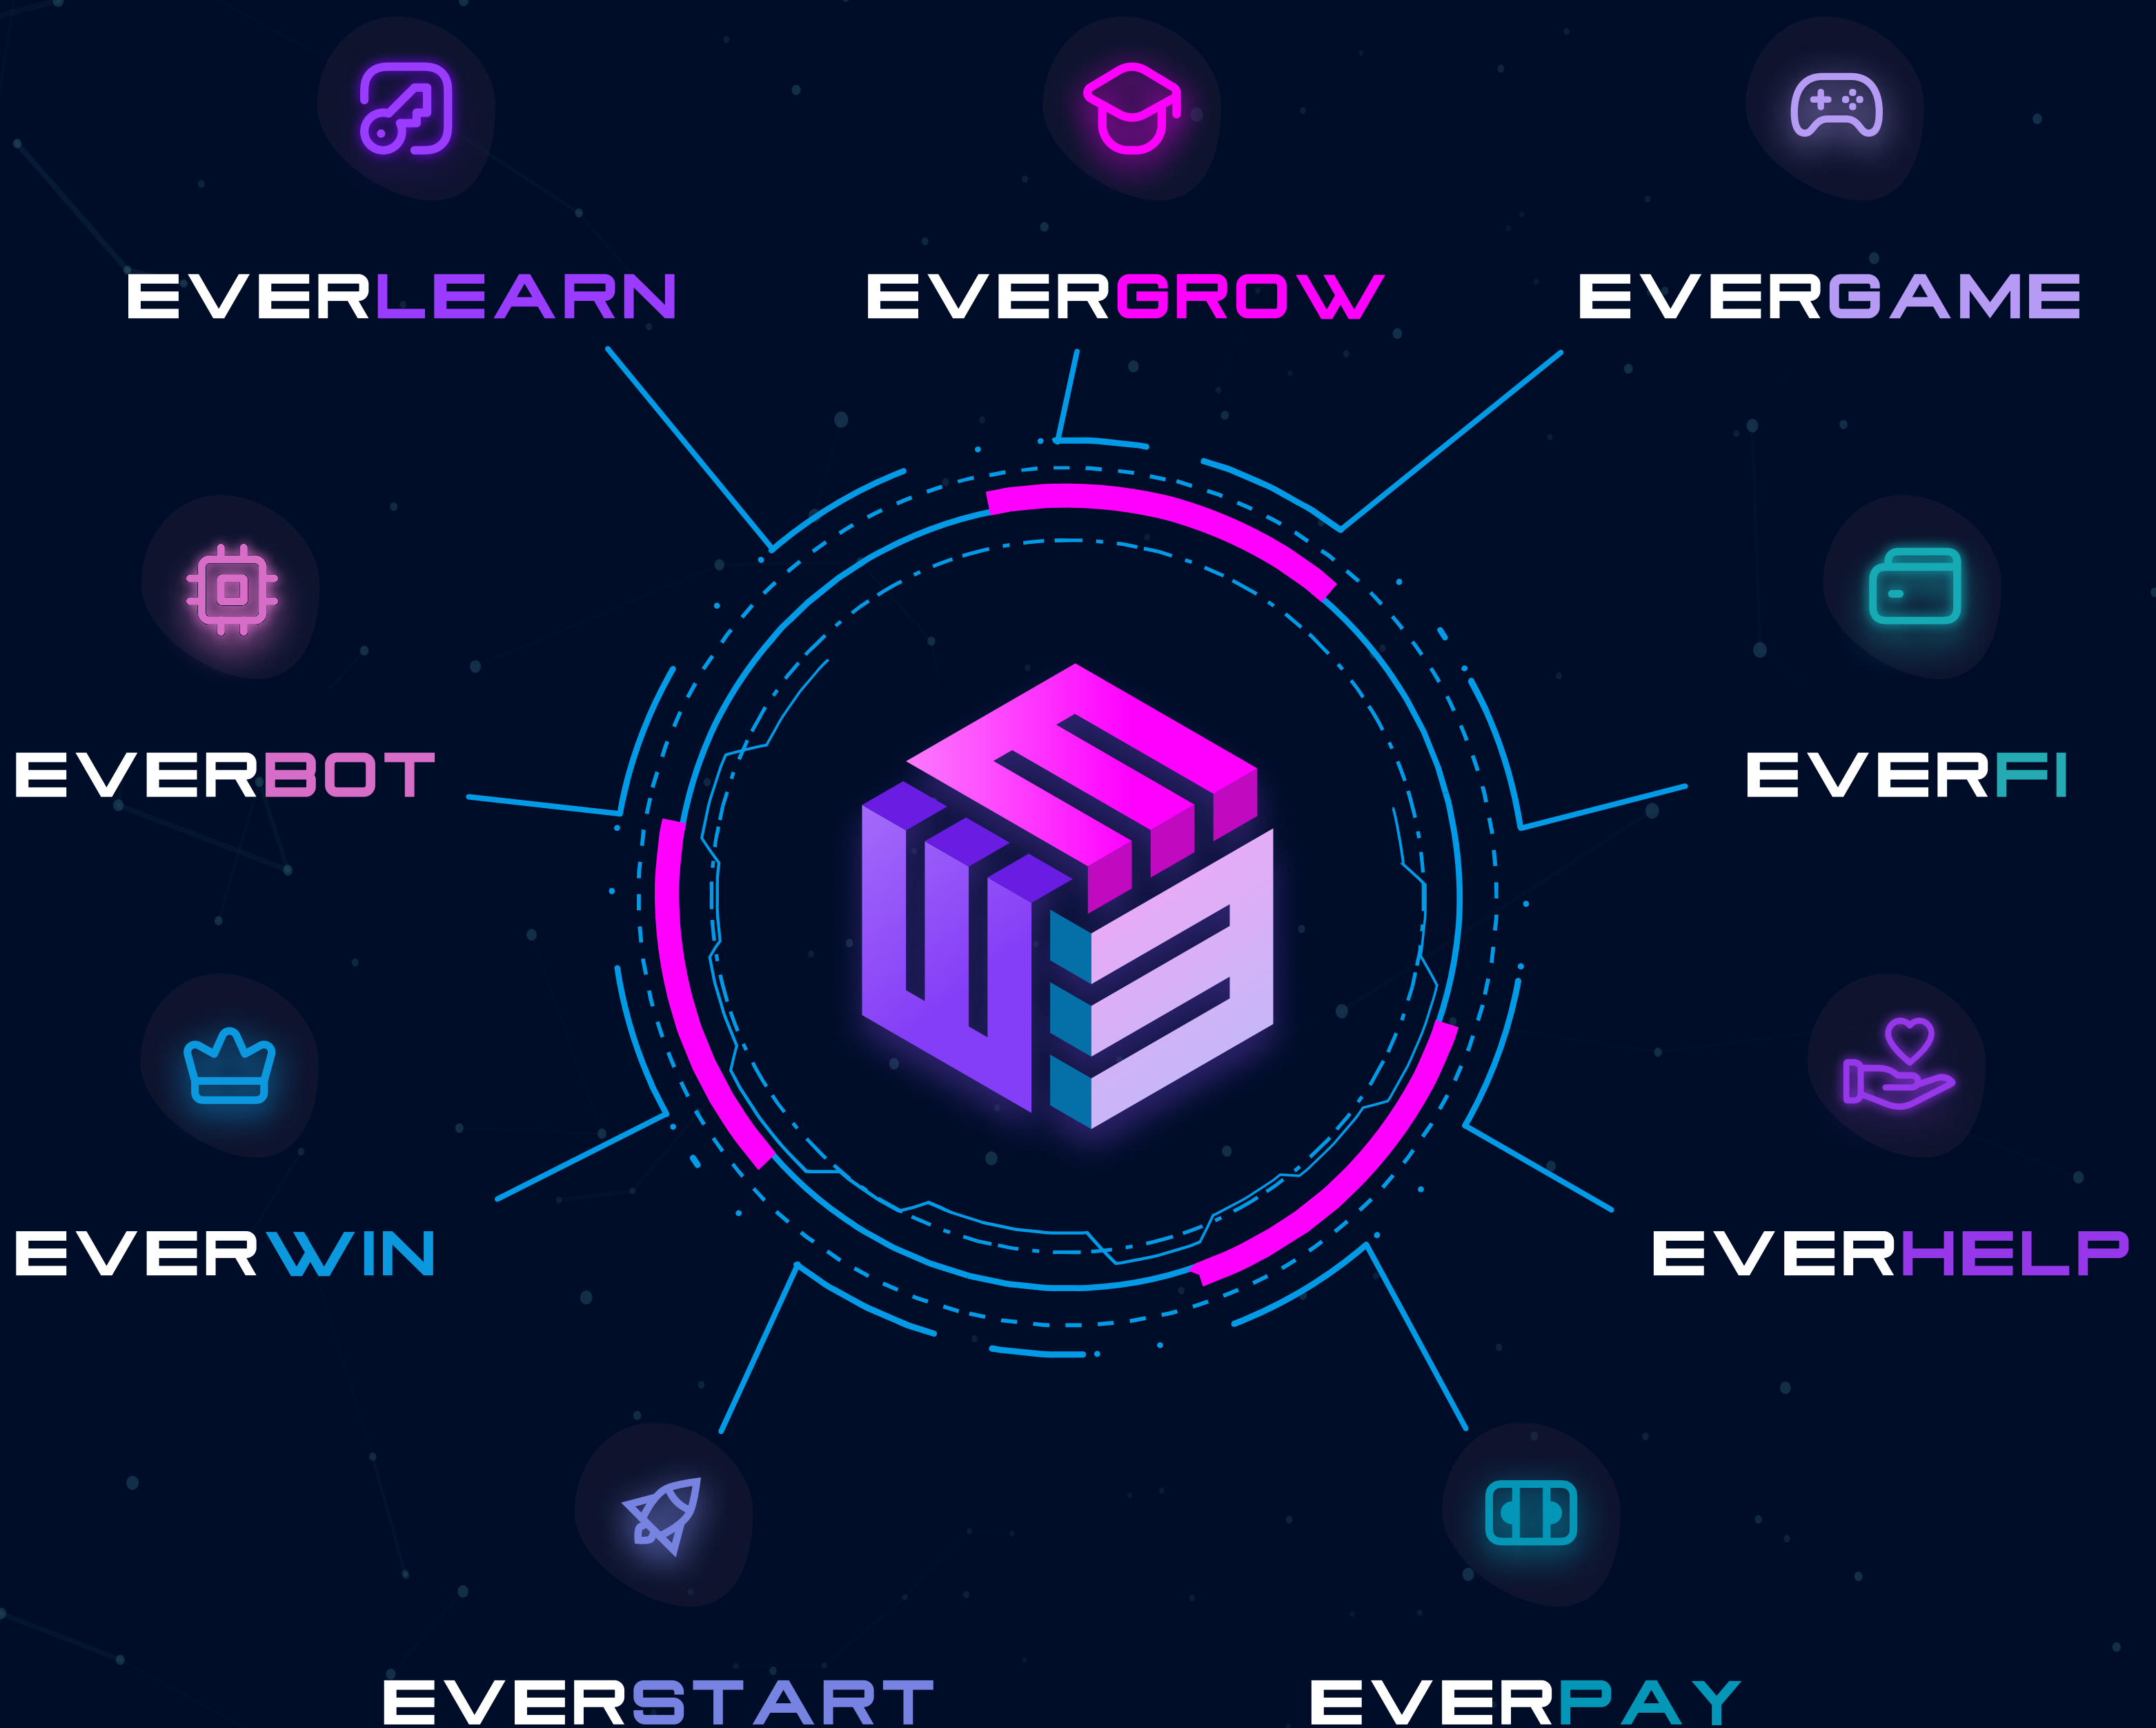

If you think that this concept is utopian, it only means that you are not familiar with the Learn2Earn philosophy. The "Learn and Earn" model is aimed at both beginners and experienced Internet users.

Through the use of products presented in the EverClub ecosystem, users will be able to learn more about such spheres as programming, web design, Internet marketing, venture capital investment, trading; acquire working skills of content making, copywriting and graphic design; master the basics of computer literacy and Internet safety rules; learn how to use digital assets and earn on them. In fact, the EverClub platform is designed for everyone who would like to start making money on the Internet, but does not know where to start.

In the process of developing the project, we realized that to fully implement our concept, we cannot limit ourselves only to creating an educational service. We need a multifunctional platform that can unite services of different orientations: educational, charitable, investment, gaming and entertainment.

This is how the idea of creating a decentralized
EverClub ecosystem, including 9 products,
was born:

EVERLEARN

the ecosystem's flagship, a service offering access to educational programs, courses and learning products

EVERGROW

a service for testing acquired skills and knowledge

EVERGAME

a digital service for distribution of computer games and programs

EVERBOT

a exclusive service of algorithmic trading with robotic trading brokers

EVERWIN

a service of bonus programs for top network leaders

EVERFI

a service for organizing distribution and collaborations with other Blockchain and FinTech projects

EVERHELP

a service for holding charity events, lotteries and contests

EVERSTART

a decentralized crowdfunding platform

EVERPAY

a proper payment service

AS YOU CAN SEE OUR PLANS ARE PRETTY AMBITIOUS!

But that's not all - remembering that keeping in mind that “it's a poor soldier that never wants to become a general”, the EverClub team plans to transform its educational platform into the world's largest decentralized international Learn2Earn online university in the future. Launching a project of this scale certainly requires enormous efforts and financial costs. That is why we are interested in attracting professionals to the community who can and want to become a part of something bigger, share their experience and knowledge with newcomers and contribute to the fight against such a global problem as poverty.
